19 March 2010

SUBJECT: “Nutritional Assessment of Children 0-12 Years Enrolled in the SMRU Vaccination Campaign for Migrant Population.”

Please find enclosed a copy of the assessment of anthropometric measurements taken during the SMRU catch up-vaccination campaign at 49 migrant schools during the months of September to November 2009.

This report, presents what we believe is a first evaluation of children from migrant Burmese workers living in Tak province. We have taken the opportunity of this vaccination programme to describe the nutritional status of the children of Burmese migrants due to the absence of nutritional statistics for this particular group.

If you have questions regarding the report or would like to discuss it further, please do not hesitate to contact the authors.

Sincerely,

Prof. Francois Nosten
SMRU Director
